Newton Dakua

DESIGNATION: SOFTWARE ENGINEER
COMPANY: PERENNATION COMPUTER SOLUTION GLOBAL PVT LTD.

Phone: +91 8339855633/8917201875 | Email: newtondakua701@gmail.com | Location: Bengaluru, India

Professional Summary

Having 3+ years of experience in Software Engineer specializing in Java, Spring Boot, and RESTful API development with experience in healthcare and media platforms and recently worked in flutter for FE. Proven ability to design scalable backend services, implement FHIR-based integrations, and improve application stability through debugging, unit testing, and performance optimization. Strong knowledge of Agile development, microservices architecture, and PostgreSQL database management.

Technical Skills

- Programming: Java (Core Java, Java 8+), SQL, Flutter
- Frameworks: Spring Boot, Spring MVC, Spring Data JPA
- Web Services: RESTful APIs, Swagger / OpenAPI
- Databases: PostgreSQL
- Messaging: Apache tomcat/kafka
- Tools: Git, Jenkins, Docker, Kubernetes, Postman
- Testing: JUnit, API Testing
- Methodologies: Agile, Scrum
- Operating Systems: Windows, Linux

Work Experience

Software Engineer - PCS Global Pvt. Ltd., Bengaluru

Jun 2025 - Present

- Engineered scalable RESTful APIs using Spring Boot to process surgical device data for healthcare platform.
- Developed FHIR-compliant data exchange services to enable interoperability with clinical systems.
- Reduced recurring production defects by 20 percent through root-cause analysis and improved unit test coverage.
- Optimized database queries and request handling to enhance API reliability and throughput.
- Participated in Agile sprints, delivered client demos, and ensured timely feature releases.

Associate Engineer - Kozy Kreative Concept Pvt. Ltd.

Nov 2019 - Apr 2022

- Developed backend service components using Core Java for IPTV media streaming platform.
- Built reusable Java utilities that reduced manual testing effort and improved automation efficiency.
- Resolved production issues to maintain uninterrupted video streaming and platform stability.
- Reviewed pull requests and contributed to proof-of-concept implementations for new features.

Projects

SALON SATHI

- Developed backend services using Spring Boot to process the real time owner barber and admin process.
- Implemented FHIR-based salon data integration using RESTful APIs.
- Showing the essential pages to user, we use flutter for Front End.
- Enhanced database performance and reliability using PostgreSQL optimization techniques.
- Technologies: Java, Spring Boot, REST APIs, PostgreSQL, Swagger, Kafka, Flutter

Health Suite Digital Platform (HSDP)

- Developed backend services using Spring Boot to process real-time surgery device data.
- Implemented FHIR-based healthcare data integration using RESTful APIs.
- Enhanced database performance and reliability using PostgreSQL optimization techniques.
- Technologies: Java, Spring Boot, REST APIs, PostgreSQL, Swagger, Kafka

Online Examination System

- Built secure web-based examination platform with authentication and authorization modules.
- Implemented timer-based exam workflow with automatic submission on timeout.
- Developed instant result evaluation and display module to improve user experience.
- Technologies: Java, Spring Boot, HTML, CSS, JavaScript, PostgreSQL

Education

- Master of Computer Applications (MCA) - NIST Institute of Science and Technology, Odisha – Graduated.
- Bachelor of Science (Chemistry) - Berhampur University, Odisha – Graduated.

Certifications

- Programming in Java - Yhills
- Database Management System - NPTEL (Elite)
- Programming in Java - NPTEL
- Java Full Stack Development Training - JSpiders, Bengaluru

Languages

English – Fluent | Hindi – Fluent | Odia – Native

Declaration

I have declared that the above description is correct.
